Waltman

Patton State Hospital

Patton, CA

Norment's contract for Patton State Hospital included furnishing, engineering and installing a personal duress system which is PLC based, utilizing touchscreen control and monitoring stations. The state-of-the-art system includes voice annunciation on the touchscreen stations and strobe lights strategically positioned throughout the various buildings to help the response team locate the alarm.

The system also included installation of more than 2,000 duress receivers installed in 14 buildings on the complex. There were 49 PLC and touchscreen consoles installed at nurse stations located throughout the facility.
